

RockWise ERP Enterprise Resource Planning

DYNAMESH

ROCKWISE ERP EMPOWERS MANAGEMENT WITH KEY INFORMATION TO MAXIMIZE EFFECTIVENESS

Nowadays, construction, consulting, manufacturing, trading, retail companies and others need to have up-to-date and accurate information in order to compete in the local, regional and global markets by responding to business requirements in an effective, economical and efficient manner.

RockWise Enterprise Resource Planning (ERP) aims at providing up-to-the-minute information to those who need it at the time they need it in the most efficient and cost-effective manner while maintaining data integrity, thus helping front-line and senior managers achieve their objectives.

RockWise ERP provides management and operations teams with the tools that enable them to influence project schedules, reduce overall cost and improve profitability by having access to the latest information for their business units in a corporate and multi-regional environment.

RockWise ERP enables your organization to standardize and unify its working procedures and business processes. It empowers decision makers by providing them access to the required information that they need in order to monitor the performance of each company, branch, division, and project.

COMPLETE INTEGRATION

RockWise ERP integrates more than 30 modules from seven main packages that cover:

- Engineering and Contracting
- RockWise 5D Automation
- Financials and Commodity Control
- Human Resources and Payroll
- Material Control and Production
- Plants and Equipment
- Sales Management
- Mobile Application

In addition to the above, Document Management System integrates with most of the modules of RockWise ERP. Furthermore, RockWise ERP interfaces with Primavera in order to update project activities with actual and accurate cost related to labor, material, and equipment.

ROCKWISE ERP RESPONDS TO THE NEEDS OF GROUPS WITH MULTI-DISCIPLINED ACTIVITIES

RockWise ERP with its integrated packages enables a group of companies that work in different sectors to streamline their operations efficiently and effectively.

RockWise ERP helps standardize all information systems across the Group even if they are working in different countries or continents.

RockWise ERP responds to country-specifics while maintaining overall standards across the Group.

RockWise ERP manages intercompany transactions, and facilitates generating consolidated financial reports. RockWise ERP integrates with Oracle Business Intelligence (BI) System to facilitate custom-made queries and reports.

Whether the business activity is in construction, consulting services, manufacturing, commodity trading, retail, or a combination of several sectors, RockWise ERP has the answer.
